

NOTES:

1. VALUES OF CAPACITORS IN MFD.
2. ALL RESISTORS ARE 1/2 WATT UNLESS OTHERWISE NOTED.
3. VOLTAGES MEASURED FROM POINTS INDICATED TO CHASSIS WITH 20,000 OHM/VOLT METER.

Both channels produce low output volume and severe distortion with occasional loud shot when playing. Suspect plate resistors and coupling caps between V2-V3 and V3-V7/8. Check C12, C13, C14, C15, R24, R25, R33, R34

EACH SPEAKER 12"
