

DETAIL NOTES:

1) Output Transformer (T101) is 6K Primary with 8 Ohm Secondary
2) Power Transformer 120VAC RMS Primary / 250VAC RMS Secondary with 6.3VAC tap
3) Consider using JJ multi-cap canister for HT filter

Design Features:

* Pre-Amp with Volume control (V1 as 12AY7 for Clean or swap to 12AX7 for Crunch)
* FMV Tone Stack with Treble control (Set Bass and Mid resistors to taste)
* Cathodyne Phase Inverter
* Attenuation control via L-Pad
* Power Tube cathode bias via per-amp tube heaters filaments
* Negative Feedback provision (to be decided later)
