EIA Production Source Code (EIA-476-A) Compilation - Version 5.0 - 16.07.21

Transcribed, compiled and edited by Jakob H. Thordarson - j@reverb.is

Contains 37 yearly EIA Code lists: '46, '49 to '69, '71 to '73, '77, '80, '81, '87, '89, '94 to '99 and 2001

Newest version can be found online at: **tinyurl.com/eiacodes**

Code	Company/Manufacturer	Year	Address	City	State	Country
1	Fastex Division, Illinois Tool Works	1957		Des Plaines	Illinois	USA
1	Fastex Division, Illinois Tool Works	1958		Des Plaines	Illinois	USA

Information about EIA Codes

Transcribed from the 1994 EIA Code List:

1. What is the EIA Source Code?

It is a numeric symbol, assigned and registered by EIA Headquarters, which may be stamped or marked on any or all products to identify the production source or the vendor assuming product responsibility.

The EIA code, in addition, provides for adding numerals to the source code symbol to identify the year and week of production.

2. How does the date code work?

In addition to a source code, it may be desired to identify the date of production. This can be done by adding, following a hyphen (-), the last two digits of the production year plus the number of the week of that year.

Say a company is assigned the source code **113**. To this is added *two digits for the year* - such as **94** for ***1994***, or **95** for ***1995*** - and *another two digits for the week of the year*.

The combined source and date codes would be, in this case:

113-9410

which would represent the company's number **113** plus **94** for **1994**, the production year, and **10** for the week of ***March 6-12***, the production week.

For convenience in identifying the week, date code tables in the back of this booklet give the number of each week in both 1994 and 1995.

If a component manufacturer is unable to use the four-digit date code, and alternate three-digit code may be used by taking only the last digit of the year.

The example above would then become:

113-410

Name history of the EIA:

1924 - Associated Radio Manufacturers

1924 - Radio Manufacturers Association (RMA)

1946 - RMA/EIA Production Source Codes formally begin

1950 - Radio Television Manufacturers Association (RTMA)

1953 - Radio Electronics Television Manufacturers Association (RETMA)

1957 - Electronic Industries Association (EIA)

1997 - Electronic Industries Alliance (EIA)

2001 - Last official release of an EIA member codes list *(EIA-476-A)*

2001 - EIA is dissolved into the ECA, JEDEC, GEIA, TIA and CEA

2001 - ECA merges with NEDA to form the ECIA

The ECIA still publishes EIA-476-B date codes to this day (2021):

https://www.ecianow.org/eia-weekly-date-codes

Notes from the Editor:

As of V5.0 I've manually added 20 "mystery" numbers to the compilation.

These are numbers that have not yet appeared on any EIA Production Source Code list that I've seen.

Until now I didn't want to clutter up the compilation with EIA manufacturer codes that I had no information about, but the 1997 list alone reduced the number of unknowns from 43 down to a total of 20 (as of V5.0 - 16.07.21) so now I feel confident enough that highlighting these unknowns won't be too much of an issue.

I gained information as to the nature of numbers 490 to 1233 from the official ECIA excel documents that are available at this page: https://www.ecianow.org/eia-source-codes

Those documents unfortunately do not mention what years said companies were active, therefore I've had to mark their years as "Unknown"

Every unknown number so far: (as of V5.0 - 16.07.21)

490 - Union Electronics Corp.

492 - Northeastern Engineering, Inc.

1032 - Electric Coil Co.

1034 - Raemick Electronics Corp.

1111 - The George E. Grahm Co.

1138 - Vought Electronics, Div. Of Ling-Temco-Vought, Inc

1155 - Polyphase Instrument Co.

1164 - Atlas Connectors, Inc.

1177 - Electron Div, Controls Co. of America

1233 - Waterman Electronics Tube Co.

1244 - Unknown

1245 - Unknown

1246 - Unknown

1248 - Unknown

1255 - Unknown

1258 - Unknown

1262 - Unknown

1265 - Unknown

1269 - Unknown

1271 - Unknown

1282 - Unknown
